ABSTRACT:

PROBLEM TO BE SOLVED: To prepare an antiinflammatory agent, comprising a solvent extract of Mallotus japonicus Muell. Arg., capable of suppressing an edema, having excellent antiinflammatory effects, effective against skin roughening, etc., excellent in safety for skin and useful as an active ingredient of a medicine (a quasi- drug) or a cosmetic.

SOLUTION: This antiinflammatory agent comprises a solvent extract of Mallotus japonicus Muell. Arg. prepared by extracting a bark of the Mallotus japonicus Muell. Arg. [concretely a dried bark of the Mallotus japonicus Muell. Arg. of the family Euphorbiaceael with water or a hydrophilic organic solvent, e.g. ethanol, methanol, acetone, glycerol, 1,3-butylene glycol or propylene glycol. The antiinflammatory agent is prepared as a dosage form such as a lotion, a cream, a milky lotion or a pack by adding a liquid oil, e.g. squalane, a solid oil, e.g. beeswax or various surfactants, a humectant, etc., thereto.
